

Technology of the Future....Protection for today

# IPES IR FLAME DETECTOR

JSC "Electronstandart-pribor"'s Model IR flame detector is designed to detect and alarm for conditions of flame and fire within it's field vision. One a condition is detected it would transfer alarm signals to receiving-and –control devices (RCD) of control and operations rooms, fire alarms, and burglar/fire alarm systems.

The model IPES IR with integrated infrared sensors is allowed to monitor fires in IR spectral range with a 90 degree field of view.

Optical filters and design of receivers determine the range of maximum spectral sensitivity of the detector for IR radiation - 4,2...4,6 micron. The sensors and optical filters are chosen so that IPES is maximally sensitive to the radiation produced by fire provided flare light from incandescent lamps, sunlight and hot objects is maximally suppressed. Based on operational wavelength and distances, the coefficient of extinction for air is negligible.

In the process of operation, IPES generate dry relay contacts, informational analog signals 4-20 mA and standard communication channel RS-485 under protocol MODBUS RTU. IPES is made in an explosion-proof modification for use in hazardous (classified) locations; the type of implosion protection is "Explosion-proof", Class I, Division 1, Group B, C& D, T4.

## Field of application

- Warehouses of combustive-lubricating matter
- As parts of fire extinguishing systems
- Flammable and explosively dangerous zones with high concentration of hydrocarbons, oil and oil products
- Flammable and explosively dangerous manufactures
- Gas transporting and storage facilities

## **Features and benefits**

- Electronic report of events
- Low power consumption
- Immune to false stimuli sources
- Adjustable and stable swivel mounting
- Digital, analog and "dry contact" relay outputs
- Additionally provided firesimulator for operability testing
- High sensitivity due to the use of optical, multispectral sensors
- Possibility to connect external control and fire warning systems
- Less number of detectors required to achieve complete coverage
- Protection from corrosion and wide operation temperature range allowing to use IPES in hard environmental conditions and in the rooms without heating

#### **Electrical Characteristics**

**Operating Voltage** 24 vdc. Operating range is 18 to 30 vdc.

Not exceed 2 VA at standby state Power consumption

Not exceed 3 VA at fire alarm

Analog signal 4-20mA **Current Outputs** 

Fault signal  $2 \text{ mA} \pm 0.1 \text{ mA}$ Ready signal 4 mA ± 0,1 mA Fire signal 18 mA ± 0.1 mA **Test Mode**  $8 \text{ mA} \pm 0.1 \text{ mA}$ 

Digital: RS 485, Analog: 4-20 mA **Relay Contact** 

"Dry Contact" Relay

Fault:

Fire Alarm: - From X3, (3,4)

normally closed latching/non-latching

- From X3 (1.2)

- normally open

latching/non-latching

Standby: - From X3 (3,4)

- normally open

- From X3 (1,2) - normally closed

**Operating Temperature** -40°F to +185°F

(-40 °C to +85 °C)

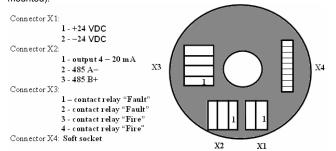

-76°F to +185°F Storage temperature

(-60°C to +85 °C)

0 to 100 % Relative humidity, **Humidity Range** non-condensing

#### Arrangement and functions of connection terminals

The Figure presents the arrangement and function of mounting connection terminals on the IPES back plane (viewed from the side where the elements are mounted)

#### **Mechanical characteristics:**

Stainless steel 316/ Aluminum **Enclosure Material** 

3/4 inch -14 NPT Cable Entry

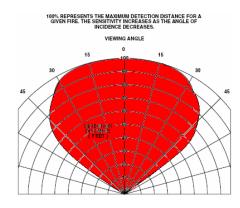

Wiring 15 AWG (101.4 feet per pound)

5,5 lbs (2,5 kg) Aluminum: Stainless steel: 11 lbs (5,0 kg) Weight

Warranty 5 years

#### Field of View

The detector has a 90° cone of vision (horizontal) with the highest sensitivity lying along the central axis.

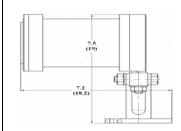

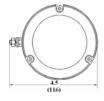

Response Very High Sensitivity

Fuel	Size	Distance	Typical Response
		Feet (M)	Time (Sec.)
n-Heptane	1 ft x 1 ft	85 (26)	4.52
Methanol	1 ft x 1 ft	82 (25)	4.9
JP5	2 ft x 2 ft	100 (30)	4.5

#### **Dimensions**

Dimensions shown in inches (centimeters)

### Certification:

**NEMKO 06 ATEX 1219X**
